## Metric by Maharam

*Metric* is an upholstery textile created by Maharam Design Studio with a simple yet sophisticated expression. Suitable for all types of seating and upholstered walls, it combines sustainable design with excellent stretchability for easy upholstery.

Reflecting Maharam's commitment to creating products with reduced environmental impact, cross-dyed *Metric* is made from 51% post-industrial recycled polyester. Woven with two types of fibre, it features a refined and tactile two-tone structure, which is only revealed when the fabric is dyed.

Importantly, the environmental benefits of *Metric* go beyond the use of recycled polyester in its construction: the fabric, which is GREENGUARD Certified and GREENGUARD Children & Schools Certified for low emissions, can also be used to create healthier, more sustainable indoor environments.

The palette for *Metric* is comprehensive: consisting of 28 colours, it includes a full range of neutral tones, as well as bright accent nuances in mustard, raisin, emerald, cobalt, rust and maroon.

### **Maharam by Kvadrat**

The partnership between New York-based Maharam and Denmark-based Kvadrat creates a dynamic textile alliance with a global reach. A shared philosophy of design innovation and service excellence makes the collaboration a natural step, as both entities continue to expand their international presence.

Maharam represents Kvadrat in North America while Kvadrat represents Maharam in Europe. The two companies work in tandem in other markets, including Australia and the U.A.E. Their combined product offering represents the largest range of contemporary contract textiles anywhere in the world.
